Re: Delivery of correction pages for Dr. Michel's expert report and compact disc of ADIOS2 model data in *United States and State of Louisiana v. CITGO Petroleum Corporation*, Case No. 08-893 (W.D. La.)

Dear Eddie:

Enclosed please find correction pages for Dr. Michel's expert report. These corrections relate to Dr. Michel's ADIOS2 model calculations. Of primary interest, the area inside the containment dike was corrected for the evaporation calculation in Table B-2 and the wind speed was corrected for the evaporation from the Indian Marais in Table B-3. Corrections to the model correspondingly affected some of the volume figures presented in the body of the report. Hence, the enclosed correction pages should be used to replace the following pages from the original report: 2, 19, 20, 22, 23, 37, 38, and B-1 through B-7. I've also enclosed a complete copy of the report for your use. Because you requested an electronic copy of the model runs last time, I've also enclosed an electronic copy of Dr. Michel's ADIOS2 modeling data in Excel and .ADS formats. Please feel free to call me if you have any questions.

Sincerely,

Jason T. Barbeau
